

NATIPIDE® II

-Liposome concentrate containing 20% of a purified phospholipid fraction with high phosphatidylcholine content
Vesicular gel solely built-up from liposomes
Instant-Liposome-System for the production of liposomal formulations
Patent No.: EP 0514 435 B1

Composition :

Phospholipids from soybean	≥20%
(with 3-sn-phosphatidylcholine 76± 3%)	
Ethanol	16± 2%
Water	ad 100%

Applications :

Liposomes for dermatology and cosmetics
Improvement of skin humidity and skin penetration
Suggested concentration: approximately 10%

Characteristics

Yellowish-brown gel	
Preservation	alcohol
Mean particle size of the liposomes	max 220
Typical lamellarity of the liposomes	4-6

INCI designation

Aqua (and) lecithin (and) alcohol

Packaging :

10 kg plastic pails

Storage :

Protect against freezing, store below 25°C
Keep containers closed
Use soon after opening the package
